Frontend: React.js, Angular, HTML5, CSS3, Material UI
Backend & APIs: Flask, RESTful APIs, databases, Ruby on Rails
Tools & Practices: Git, GitHub, Bootstrap, AccelQ functional test automation, WCAG

EXPERIENCE

Software Engineer Senior Analyst | Wells Fargo
Charlotte, NC | 2019–2026

- Developed, maintained, and supported internal web-based platforms that support loan-approval workflows and contribute to process efficiency, security, accountability, and risk assessment.
- Reviewed complex enterprise technology solutions against tactical and strategic business objectives.
- Designed, coded, tested, debugged, and documented front-end projects in an enterprise technology environment.
- Automated functional testing using AccelQ to support software quality and testing workflows.

Technology Associate | Synechron
Charlotte, NC | 2017–2019

- Worked with company consultants and client employees to support a financial-services client.

Technology Advisor | Clergy Image
Remote | 2016–2018

- Worked with the CEO of a clothing-industry startup on a web-based platform for customer ordering, manufacturing, transportation, and logistics.
- Supported requirements for an ordering platform handling thousands of product variations.
